

NICHAPAT THAMMAWIT

Product Designer | UX/UI Designer | AI-Assisted Product Development

Chiang Mai, Thailand • nthammawit@gmail.com • 099-271-1089 • nichapat-portfoilo.vercel.app

PROFILE

Product Designer with experience across UX/UI design, product development, frontend development, AI-assisted coding, manual testing, project coordination, and business operations. Turns ideas into practical digital products — from requirements and user flows through development, testing, and iteration. Combines design, technology, and business thinking, backed by a Computer Engineering background and ongoing MBA studies.

EXPERIENCE

CEO & Product Designer

Jan 2026 – Present

ALAB

- Lead the development of ALAB, a Chiang Mai-based product and craft brand.
- Develop product concepts inspired by local culture, places, and Chiang Mai identity.
- Design products, packaging, visual assets, and brand experiences.
- Manage product development from concept → design → production → sales.
- Coordinate product planning, marketing, business operations, and day-to-day activities.
- Work with local partners and creators to develop authentic products and experiences.

Product Designer / UX/UI Designer / AI-Assisted Product Development

2024 – Present

Meet Software Co., Ltd.

- Design UX/UI for digital products and web applications, from user flow to final interface.
- Designed UX/UI and graphic assets for Piika Flower Delivery, supporting approximately 50–80 customers.

piika.co/welcome

- Collaborate closely with 2 developers to translate designs and user flows into functional products.
- Conduct manual testing and document reports to identify UI, usability, and functional issues.
- Coordinate product tasks across design → development → testing.
- Contribute to frontend development using AI-assisted / Vibe Coding workflows.
- Design, develop, and test lightweight apps including Bill Split, LED Banner, and Lucky Color.
- Designed UX/UI, contributed to frontend development, and tested MeetMore and RocketBnB.
- Designed UI flows for a live-event Q&A application with audience questions and host moderation.
- Support project management and accounting / business operations.
